Modular portable booth solution

New Releases

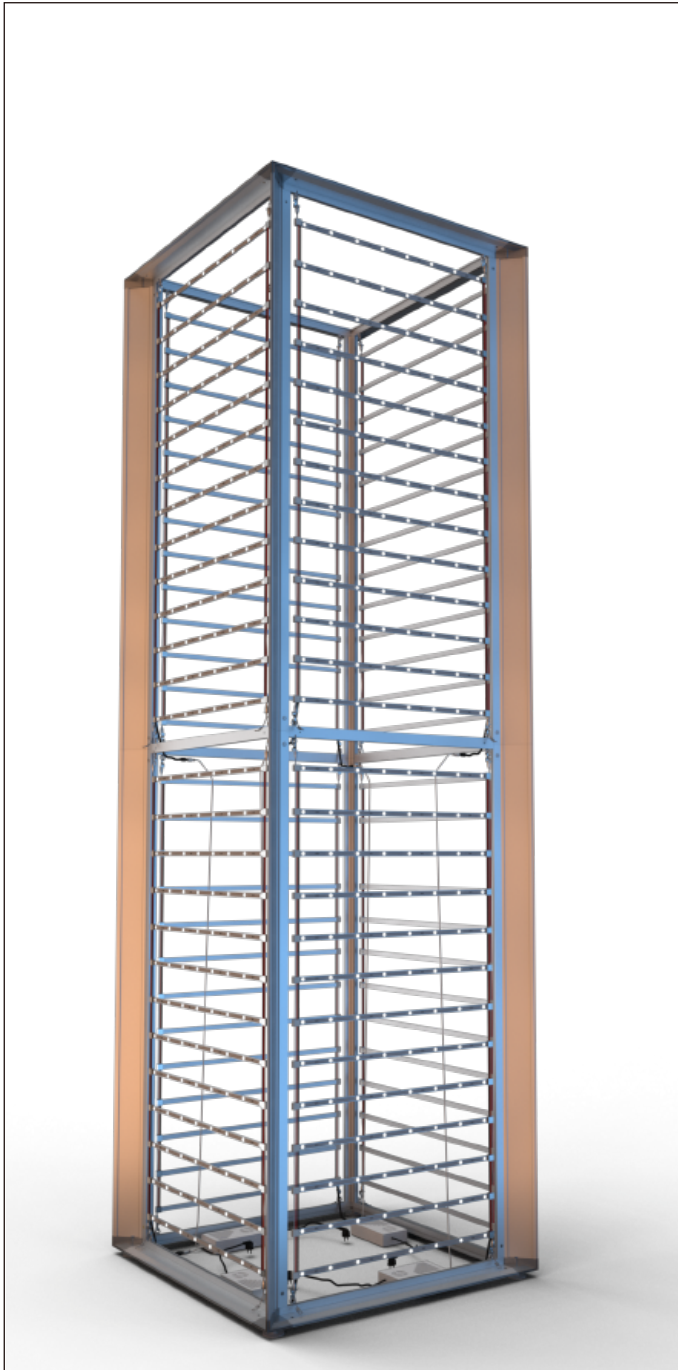

3D SEG Super Columns LightBox

3D SEG Super series is a larger, stronger version of Columns LightBox and can be used for Column that are larger than 3x3x3 m.

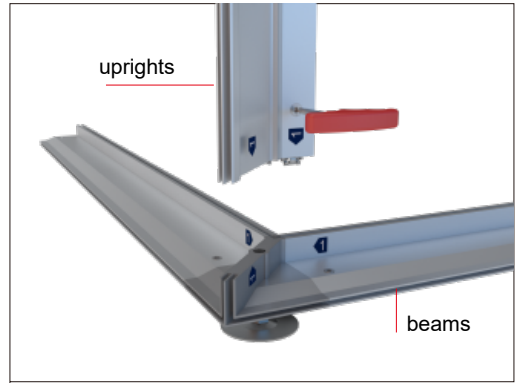

Beams profile pieces are connected to each other on the corners with zinc connector.

Fabric can be attached on four outer sides of the Column, realizing very quick assembly and almost invisible aluminum structure.

In order to reduce the size of package, the upright fabric profiles can be cut into several pieces and jointed together by connector.

Modular LED light curtain enable easy assembly. fabric print attaches to the frame with silicon edging easy to assemble and graphics change easily

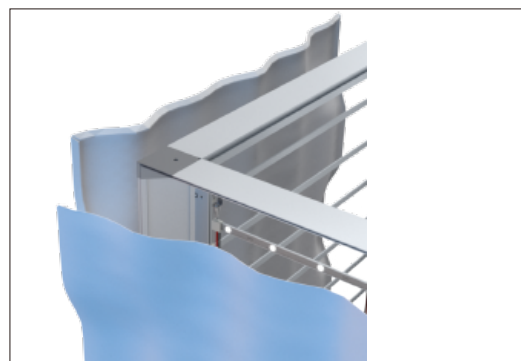

Uprights and beams connect with each other by tension locks in the corners.

Hang the LED light curtain on the ring and tighten the steel wire.

There are 2 male plugs from the transformer, which connect to the 2 DC female plugs from the LED light curtain.
